

- ✳ Increased cooling performance needed for modern roads, fuel, and temperatures.
- ✳ Improved performance, engine efficiency and MPG.
- ✳ Installed using existing mounting points, with no permanent modifications.

\*Radiator for illustrative purposes only. Not included in kit.

#### Revotec 38mm Electronic Fan Controller

- ✳ Adjustable temperature range 150-250°F (70-120°C).
- ✳ Instant response.
- ✳ No interruption to water flow.
- ✳ Simple to install with no leaks.
- ✳ Only three wires to connect.
- ✳ Widely known as the best available.

#### Comex High Power Blowing Fan

- ✳ 15.2" High powered blowing fan.
- ✳ Replaces original engine driven fan.
- ✳ Capable of airflow over 2920 m3/hour.
- ✳ OEM quality.
- ✳ Sealed motor with ball bearings.
- ✳ High output, long-life.
- ✳ Balanced blades.
- ✳ Rated to run continuously.
- ✳ Waterproofed to IP68.

#### Jaguar MK1 Specific Radiator Brackets

- ✳ Securely mounts to existing radiator mounting points.
- ✳ Adjustable mounting brackets.
- ✳ Laser cut for precision.
- ✳ Powder coated for durability.

Upgrading to a Revotec cooling fan kit improves performance significantly.

Enjoy faster engine warm-up times, higher fuel economy, increased power output, reliable engine cooling even in hotter conditions, and protection against overheating in current traffic.

Rest assured that our cooling kits have undergone rigorous development and testing, including meticulous analysis of fan and radiator airflow performance, winning the approval of trusted vehicle specialists.

The whole package is simple to install and includes all necessary fixings.
