Lower Mesh Grille Fitting Instructions:

1. Fit masking tape around the apertures to protect the paintwork while fitting.
2. Locate the grille into the aperture and centralise the grille in the aperture as shown in fig 1.
3. Carefully push and guide the right and left-hand side outer brackets behind the aperture and check they have engaged properly by using a thin screwdriver as shown in fig 2.
4. Carefully guide the retaining bracket through the existing aperture, ensure it is secure. (Use a screwdriver through the mesh to secure the retaining bracket in place) (fig 3).
5. Remove the tape and the grille is now complete (fig 4).
