## Grille Fitting Instructions

*Please note: The outer grilles on this model have two separate fittings. **Screw fitting on the left hand side (closed)** and **bracket fitting on the right hand side (open)**.*

1. Locate the grilles into position, check they are central whilst locating the brackets (Fig 1)
2. Now that the **grille is in position in the open aperture**, check that the bracket has engaged properly, you can do this by using a thin screwdriver through the mesh as shown in (fig 2).
3. For the **closed aperture**, fasten the lower part of the grille to the existing aperture using screw provided making sure the grille is tightly fixed into position (fig 3) (Do not over tighten screws).
4. The grille is now complete.
