### Kit Contents: -

#### ZFT12806

1 off Upper Grille

1 off Lower Grille

#### ZFT7506

1 off Upper Grille

#### ZFT12706

1 off Lower Grille

### Tools Required:

Small Pliers

Thin Flat Screwdriver

### Upper Mesh Grille Fitting Instructions

1. Remove the upper existing grille; this grille can be removed from the front by pulling from one side at a time. The old part can be kept for refitting later if required.
2. Place masking tape around the apertures to protect the paintwork while fitting the new grilles.
3. Offer the grilles to the apertures and locate the brackets into the existing slots on the bumper or lower grille.
4. When you are sure the grille is in the correct central position push the grilles into place until all of the brackets are fully engaged, use screwdriver if required.
5. Your grille assembly is now complete.

### Lower Mesh Grille Fitting Instructions

1. Remove the lower existing grille; this grille can be removed from the front by pulling from one side at a time. The old part can be kept for refitting later if required.
2. Place masking tape around the aperture to protect the paintwork while fitting the new grille.
3. Centralise the grille to the cavity and locate the bottom clips first over the original panel, push the grille into place to secure all of the clips.
4. The use of a screwdriver can be made to secure the clips if required.
5. Remove the masking tape and assembly is.
