Centre Mesh Grille Fitting Instructions

1. It is advised that masking tape is used to protect the original surfaces prior to assembly, position the tape to allow for easy removal after the grille has been fitted.
2. Locate the grille over the badge plate and ensure even spacing around badge and aperture and also making sure the clips have engaged behind the existing aperture, Fig 1.
3. Ensure that all of the clips have engaged, if required use a long screwdriver whilst putting a little pressure on the front face of the grille, Fig 2.
4. Fit the 20mm pins provided through the upper bracket into the retaining bracket as shown, Fig 3, do not tighten until the grille is centralised and aligned with the badge.
