

MAZDA MX5 MKII ROADSTER Stainless Steel Sports Grille Kit

Kit Contents: -

1. off Centre Grille

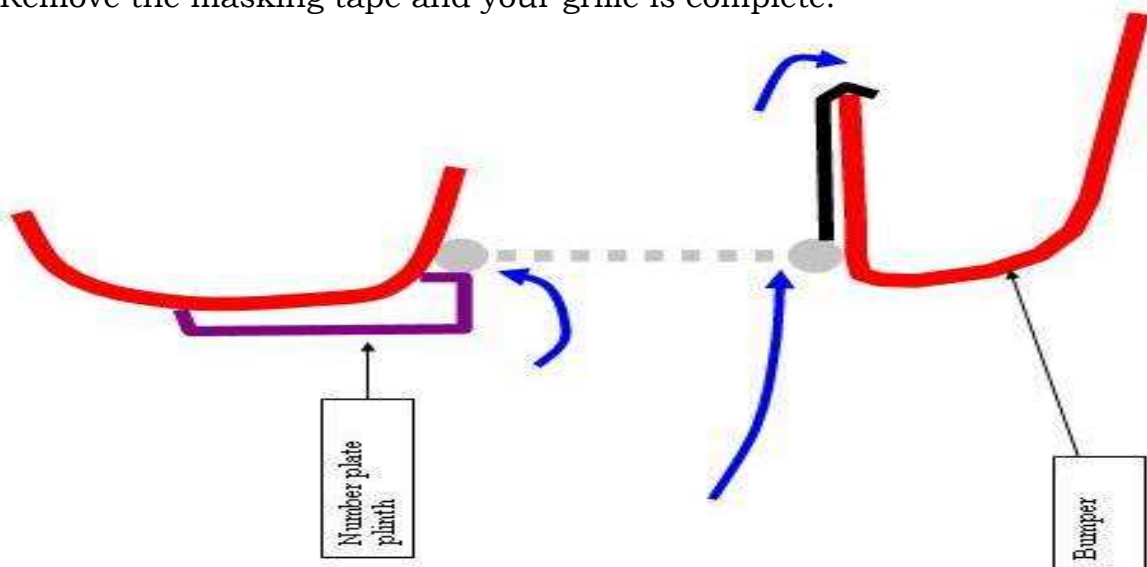

Tools Required: -

Thin Flat Screwdriver or lever

Mesh Grille Fitting Instructions

1. Place masking Tape around the aperture to protect the paint work, to avoid any accidental scratches to the paint work.
2. Locate the top of the new grille under the number plate holder first keeping the grille central to the aperture.
3. Pushing the spring brackets into the aperture, carefully push the rest of the grille into position, leaving the top of the grille back against the rear of the number plate holder.
4. When the grille is back into position the spring clips will locate behind the back edge of the aperture holding the grille into position. (If the clip does not hook into position, it may be necessary to push into place through the mesh with the help of a thin screw driver. Just put some pressure onto the front of the mesh while levering the bracket into position until it hooks in place.
5. Remove the masking tape and your grille is complete.

THANK YOU FOR CHOOSING A ZUNSPORT PRODUCT.
