Outer Side Mesh Grille Fitting Instructions

1. Fit masking tape just around the edges of the apertures to protect the paintwork while fitting.
2. Guide the outer part of the grille into the aperture (fig 1) making sure brackets have clipped behind the aperture). (You can use a long thin screwdriver to make sure they are clipped in position (fig 2).
3. Once the grille is in place and central, screw the No6 x 1" screw through the locating diamonds on the grille (fig 3).
4. Remove the tape and the grilles are now complete.
