Outer Mesh Grille Fitting Instructions:

- 1) Fit masking tape just around the edges of the aperture to protect the paintwork whilst fitting.
- 2) Guide the grille into the aperture, ensuring that the upper grille bracket secures into the aperture first (fig 1 & 2).
- 3) Once the grille is centralised in the aperture, use a thin screwdriver through the mesh to engage upper and lower brackets, ensuring they locate behind the aperture (fig 3).
- 4) Repeat this process on the other grille.
- 5) Grilles are now complete (fig 4).
