

Porsche 996 Turbo - Centre Sports Grille

Kit Contents: -

- 1 off Centre Grille
- 1 off Template

Tools Required: -

- Masking tape
- Pen/pencil

Centre Mesh Grille Fitting Instructions

1. Position a strip of masking tape at each end of the aperture as shown, Fig 1, with the inside edge of the tape up against the front of the original plastic.
2. Carefully cut out the template provided and locate it in the original cavity and up against the plastic, mark the tape with a dot where it coincides with the point on the template at both ends, Fig 2.
3. Before drilling the hole ensure that its centre is 3.5 mm inside the edge of the bumper
Using a 3 mm drill bit drill a hole at each end, Fig 3.
4. Locate the LH wire pin into the drilled hole, Fig 4.
5. Carefully flex the grille so that the RH wire pin locates in the other drilled hole, Fig 5. Remove the masking tape. Assembly is now complete.
