Existing Grille Removal Instructions

1. Firstly, start with removing the bumper from the vehicle ([see separate instruction](#)).
2. Once bumper removal is completed remove the existing upper grille from aperture as shown in.
3. Firstly, unscrew the screws holding the grille in position Fig 1 & 2.
4. Gently prize the plastic clip with a screwdriver allowing the grille to be removed Fig 3 & 4.

Upper Mesh Grille Fitting Instructions

https://www.youtube.com/watch?v=RW_HvI0JdYE

5. Guide the grille into position ensuring the brackets have guided through the slots and located behind the edge apertures as shown in fig 5.
6. Check that all the clips have hooked behind the aperture, you can do this using a long screwdriver to push the clips down ensuring it has clipped behind the aperture fig 6 & 7.
7. Once grille is in position insert screw through mesh diamond to secure to the car fig 8
8. With the grill now in place you can re-assemble the bumper and enjoy your New Upper grill.
9. The grilles are now complete.
